

Title: Don't let Your PC Catch H1N1, Download Brillertek's FaceAether Trial Online

Word Count: 259

The era of "face as password" has finally come true! No longer is it part of science fiction plot, you can now use your face to replace the troublesome password key-in steps to log into Windows. A Taiwan-based technology company has developed such face recognition software, trial available to users online, will be selling worldwide in the near future.

This software not only supports multi-OS, and it is convenient, easy, and secure to use. Users would simply need a built-in or detachable webcam, plus the software, and users would no longer need to key-in password again.

"The currently prevalent hardware equipment have performed highly superior, web cameras have become the 'must-have basics.' The market has become mature for face recognition software to take its course," says Mr. Hwang, the Vice President of Sales and Marketing Department at Brillertek Corporation.

Mr. Hwang also noted, "The technologies that you have seen in the movies have now jumped outta screen, bringing to the public the convenience that every person's everyday life could have. We anticipate that face recognition software will be one of the basic software of all personal computers."

Brillertek is composed of R&D engineers (average age of 30) with highly innovative and enthusiastic spirit. They are dedicated to the development in the area of face recognition solution and its related applications. "Let users operate by instinct" is the ultimate spirit of these engineers while developing the No. 1 face recognition software: 1) most compatible 2) swiftest recognition speed, and 3) most precise. It is called "FaceAether Windows Login."
