

**Title:** Smiles to Windows 7, FaceAether is ready for the launch

**Type:** Press Release

**Word Count:** 295 (not including summary)

**Summary:**

**Face recognition is the most friendly and non-invasive biometric technology among all others. FaceAether, the face recognition software for Windows login, is Brillertek's dedicated and newly developed software. Today Brillertek has announced their new Windows 7 compatible version.**

Windows 7 will be released and replacing Windows Vista in October this year. In addition of the problem over software compatibility and driver issues, customers are already waiting for the new features from Windows 7. Which hardware and software will introduce upgrade versions to Windows 7? Today a Taiwan-based face recognition software development company has announced its new Windows 7 compatible version.

Face recognition is the most friendly and non-invasive biometric technology among all others. The Sales & Marketing Department V.P. of Brillertek Corporation Mr. Huang had said: "All you need is a webcam. After installing FaceAether, you can immediately have this speedy Windows login feature in your PC. No additional hardware needed if your Notebook already has a built-in camera." Can this face recognition software be compatible with Windows 7? Now Brillertek has a definite answer for the customers.

"FaceAether", the face recognition software for Windows login is Brillertek's newly developed software. When Microsoft released Windows 7 RC version early this May, Brillertek's research and development team had downloaded the version in the first place to test the compatibility, and the test results had turned out quite satisfied.

Tech-watchers have predicted that Windows 7 may bring a wave of PC replacement, and a software update cyclone. Something can be sure is that FaceAether has already prepared for the Windows 7 launch.

Brillertek is composed of R&D engineers (average age of 30) with highly innovative and enthusiastic spirit. They are dedicated to the development in the area of face recognition solution and its related applications. "Let users operate by instinct" is the ultimate spirit of these engineers while developing the No. 1 face recognition software: 1) most compatible 2) swiftest recognition speed, and 3) most precise. It is called "FaceAether Windows Login."
