

Title: Fastest ever! FaceAether "Need no Touch" face recognition software for Windows login

Word Count: 263 (not including summary)

72dpi image: Please see the attached file

Summary:

Brillertek has utilized and integrated the "need no touch" facial biometric access control system to be used on personal computers. Along with a webcam, FaceAether can complete the facial identification less than 1 second, so that you no longer need any password.

Biometric technologies are becoming the foundation of an extensive array of highly secure identification and personal verification solutions. Among all the biometric features, face recognition technology is the most effective "need no touch" biometric authentication application.

Brillertek Corporation has overcome the biometric technology limitation, utilized and integrated this large enterprise facial biometric access control system to be used on personal computers. Along with a webcam, FaceAether can complete the facial identification less than 1 second, so that you no longer need to memorize any passwords.

Recent years, SARS, H1N1 and other health crises had spread across the globe infecting people, "need no touch" technology will definitely be the future trend. FaceAether, Brillertek's newest Windows login software, will lead the users to a new "Need no touch" experience.

Two biggest challenges for any face recognition software are: light illuminations and human facial expressions. Hairstyles, glasses, makeup, lighting will all affect the identification accuracy.

The Vice President of R&D Department at Brillertek, Mr. Hsieh, had said, "All the built-in face recognition login software on the market has certain limitations. Brillertek has dedicated the research and development in image processing technology. We are the expert in face recognition software, from innovating to testing. FaceAether is absolutely different face recognition software among all!"

He would not hesitate to say, FaceAether is the fastest, most accurately identified,

and the best Windows compatible face recognition software. The standard edition is now on sale through Taiwan PCHome. FaceAether is also downloadable for a 30 days trial from the Brillertek official website.

Brillertek is composed of R&D engineers (average age of 30) with highly innovative and enthusiastic spirit. They are dedicated to the development in the area of face recognition solution and its related applications. "Let users operate by instinct" is the ultimate spirit of these engineers while developing the No. 1 face recognition software: 1) most compatible 2) swiftest recognition speed, and 3) most precise. It is called "FaceAether Windows Login."
