

**Title:** Instant Face Recognition Windows login software – FaceAether

**Category:** Product Press Release

**Date of Release:** July 30th, 2009

With the increasing importance of PC data security, face recognition technology has become one of the future trends. Because of the new generation on small and fast PCs, users generally expect to be able to access the computer and internet faster also more conveniently. The traditional way of Windows login, by password or fingerprint, all requires a longer access time or the recognition process is too complex. Obviously the traditional logins are unable to meet the user needs in the new era (please check the comparison table below). Brillertek has incorporated the large enterprise access control system to the PCs, the new face recognition software has lead the users to a new “Need no touch Experience.” FaceAether should be used with web camera, either built-in or USB one. The required login time is less than 1 second, so that users no longer need to memorize any passwords.

Brillertek has dedicated on the research and development of the image processing technology. The program development and program testing are all done by Brillertek’s R&D team. They aim to challenge and enhance the limits on the face recognition technology. FaceAether – the face recognition software – is now downloadable for a 30 days trial. Users are encouraged to try the fastest face recognition windows login software and provide any feedbacks you may have. FaceAether, build your future with face.
